

PRODUCT INTRODUCTION

1.Package Contents:

- LED Bulb X2
- Gloves X2
- User Manual X1

2.Product specifications

Operating voltage	DC(11-18V)
IP rating	IP67
Color temperature	6000 - 6500K
Operating temperature	-40℃ - 85℃
LED chips	High-brightness LED chips
Heat sink	6063 aluminum alloy
Cooling method	Turbo Cool Fan

USER INSTRUCTIONS

- Please purchase the product through official channels, otherwise we won't provide after-sales service.
- As the product has small & sharp parts, please keep it away from children.
- After receiving the product, please carefully check whether it is damaged or any part is missing. If there is any problem, please contact Customer Service .
- This product is only fit for vehicles which use 12V batteries. High voltage may cause damage.

If there is any questions about the bulbs, contact our service team for help.

INSTALLATION INSTRUCTIONS

1.Important Notes:

- Please light-up the bulb before installation.
- The OE halogen bulb would be extremely hot for a quite long time after shutting down the engine. To avoid burns, please wait at least 2 hours before replacing the lamps.
- Wear gloves while replacing the lamps, and do not touch the LED chips.
- If the lamps do not light-up , please unplug the power line. connect it reversely and try again.

2.Models: H7

YouTube | H7 LED headlight bulb installation

Installation instructions

Step 1: Remove the dust cover and the OE Halogen bulb. Hold the base of the lamps and turn counter-clock-wise until it is unlocked, and then remove the OE Halogen bulb;

Step 2: Put the LED bulb into the assembly. Line up the tab parts of the LED bulb with the groove sections of the locking ring, and lock the retainer holder with the buckle.

Step 3: Connect the power plug the bulb plug.

Step 4: Turn on the lights. Make sure they work normally, and there are no warning signs show up on the dashboard. Then reinstall the dust cover and close the hood.

FAQ

1.Q: The model of lamps I purchased is different from my OE halogen lamps. Can I get an exchange for the correct model?

A: The main reasons:

(1) Amazon Confirmed Fit system is not 100% accurate.

(2) Your headlight assembly is not an OE part.

Please double check the model of your OE halogen bulb. And contact our Customer Service for an exchange.

2.Q: The size of the lamps is not correct, they're either too long or too wide, and LED lamps can't be installed into the headlight assembly. How can I get proper size lamps for my car?

A: Some LED lamps are not in a 1:1 ratio with the OE halogen bulbs. The large base is for better heat dissipation and prolonging the life of the lamps. If the lamps are not suitable for installation, please contact the Customer Service.

3.Q: Do you meet the five phenomenons below?

(1) Errors on instrument panel;

(2) The Lamp keeps flashing;

(3) Can't switch between high and low beams;

(4) High and low beam reversed;

(5) The Lamp does not turn on or off.

A: The above phenomenons are decoding problems, which are mainly caused by the automotive computer failing to detect the correct signal. You can contact Customer Service to obtain the decoder and solve the decoding problem.
